plans will be used: evacuate to a nearby shelter, or evacuate to a distant shelter. Evacuation procedures are posted in every room.

Accident reports will be completed and shared with parents as soon as possible for minor injuries.

When guidance is needed, it will:

- * be related to the circumstances of the incident.
- * be appropriate to the age and developmental level of the child.
- * be used in a positive and consistent manner.

January 29, 2024

The following is the Educator policy for safe arrival and dismissal of children for your reference.

Safe Arrival & Dismissal Policy

Effective January 1, 2024

Version 1.4 (2024-01-08)

1. Accepting a child into care

When accepting a child into care, program staff must:

- greet the parent/guardian and the child;
- if shared by (or discussed with) the parent/guardian, document any one-time change to pick-up procedure during the child's check-in process on DigibotGO;
- check-in the child on DigibotGO.

2. When a child has not arrived in care as expected

When a child does not arrive at the centre, and the parent/guardian has not reported the absence in advance via the parent portal, program staff will receive a notification on the DigibotGO staff app requesting confirmation that the child has not arrived. This notification will be triggered as follows:

- **For school-age programs in the morning:** at the time of transition to school (bell time)
- **For school-age programs in the afternoon:** 15 minutes after transition from school (bell time)
- **For infant, toddler and preschool programs:** 180 minutes (3 hours) after the centre opens

If program staff does not confirm the child's absence within 15 minutes and/or if their DigibotGO device is offline, the site supervisor will be required to confirm the child's absence.

- If the child's absence has been confirmed by program staff within this time, authorized parents/guardians will receive a notification asking them to confirm the child's presence or absence. If parents/guardians do not confirm the child's absence within 20 minutes of the notification being sent, the incident will be escalated to the site supervisor (or designate), who will personally attempt to contact each person listed on the child's emergency contact listing in the sequence identified in the child's file.
- If the child's absence is not confirmed by program staff within this time, the incident will be escalated to the site supervisor (or designate), who will personally attempt to contact each person listed on the child's emergency contact listing in the sequence identified in the child's file.

Once the incident reaches the site supervisor (or designate), they will determine next steps based on situational factors. The site supervisor (or designate) will document all interactions in the Digibot-generated incident report – including phone calls, voicemails, emails, conversations with the school and any contact with third party agencies – as these occur.

The incident will be considered resolved if, at any point, the child's check-in or absence is properly recorded.

3. Releasing a child from care

Staff supervising the child at the time of pick-up must only release the child to a parent or authorized contact listed on the child's Digibot contact listing available in the DigibotGO staff app or on the child's printed emergency card. During the first three (3) interactions between a staff member and a parent/emergency contact, the DigibotGO staff app will require the staff to confirm the person's identity:

- by checking with another staff member, or;
- by checking the person's photo identification.

If the person is not listed as an authorized contact for pick-up, program staff must obtain authorization in person or verbally (by telephone, walkie-talkie, intercom, etc.) from the site supervisor or an SADP lead to release the child to this person. In this case, an automated email will be sent to parents/guardians to document the interaction and remind them to add the emergency contact via the portal.

4. When a child has not been picked up upon centre closing

If a child's pick-up has not been recorded by the centre's closing time, an incident will be generated and will be escalated to the site supervisor (or designate), who will personally attempt to contact each person listed on the child's emergency contact listing in the sequence identified in the child's file.

If no parent/guardian or emergency contact can be reached within 60 minutes, the site supervisor (or designate) will determine next steps based on situational factors. In some cases, these next steps can include contacting one or more external agencies for guidance.

The incident will be considered resolved if, at any point, the child's dismissal (check-out) is properly recorded.

5. SADP Incident Reports

Every time SADP steps are engaged, regardless of level, an SADP incident report will be generated. Incident reports will require an electronic signature from the site supervisor as well as a parent/guardian. At the centre's discretion, several high-level incidents may result in further warnings and/or termination of childcare services.

6. Dismissing a child from care without supervision

Staff will only release the child to a parent or authorized contact listed on the child's Digibot contact listing available in the DigibotGO staff app or on the child's printed emergency card. Under no circumstances will children be released from care without supervision.

7. Parent/Guardian Responsibilities

Parents/guardians agree to:

- report their child's absence in advance via the parent portal; s/ maintain their child's updated emergency contact listing via the parent portal;
- notify program staff of any punctual changes to their child's daily drop-off or pick-up procedures.

In addition, the organization uses several Digibot technological tools and features to support the implementation of this policy.
